## LETTER OF RECOMMENDATION

It is my immense pleasure to recommend **Mr.Koushik Chanda** to your institution for Masters in Computer Science program. The first impression that one forms of him is that of a person endowed with technical soundness and intelligence to put it to optimum use. He was not only a competitive student but also showed impressive grasp of technical concepts. He was always a passionate learner and never failed to impress me with his hard working capability. It would be right to say that with qualities like dedication and hard work already present in him, he is bound to go places.

I taught him '**Linux programming**'. During my 3 years of acquaintance with him, the notable quality that has thoroughly impressed me is his sharp thinking. He never missed his classes and never failed to meet any deadlines. An eager and keen student in grasping anything new, he has been regularly keeping himself updated about the latest developments in his field, which he has achieved through active participation in the seminars conducted by our College and extensive use of the college library.

His understanding of the subject, as well as his quest for knowledge constantly impressed me. He has repeatedly proved his conceptual ability and creative outlook in the classroom debates with his novel problem-solving methods. He has a flair for keeping himself abreast with the latest developments in technology.

Besides the course work, He attended many technical seminars and even organized a few workshops. His abundant personal charm and excellent etiquette have made him popular among his student friends and have endeared him equally well to the faculty. Undoubtedly, he will be a course of inspiration to others.

Looking at his personality in a holistic way, I sincerely believe that he will bring his optimism, passion, and tireless creativity to your University as a whole. I strongly recommend him for graduate studies in your university with full financial assistance.

  
**Dr. B. Vikranth**
